Friends,

We hope you were able to review the email we sent out last week with the latest on our work to support sustainable growth, without heavy industry, and to ensure government transparency in Jefferson County.

As this year comes to a close, we'd like to take time to reflect on our past year as an organization. 2021 has brought challenges as well as successes. We have continued fighting on the legal front by filing court cases. Check out our most recent legal update [here](#). We have continued to lead political action through voter education and promoting the election of officials who will protect our environment and quality of life. We also partnered with other organizations

for important events that empower our community like the WVU School of Public Health heavy metal testing. Last but not least, we were able to gather with community members and friends at the Save Our Valley and Pickin' on Polluters events.

We are extremely grateful for all who have supported us this past year. Without your help, we wouldn't have been able to accomplish all that we have. A heartfelt thank you to all our supporters. Whether you recently joined us in this fight or have been with us since the beginning we want to say thank you for all your contributions: research, activism, and financial support! We are asking for your continued support as we enter Jefferson County Vision's fourth year.

This year, for gifts of \$25. and above, we are excited to offer a token of appreciation: JCV masks, bumper stickers and t-shirts. You may select an item at varying levels. These items will show your support for "Protecting the Panhandle" and help us get the word out; we are continuing to fight!

Happy holidays to all,

The JCV Board of Directors
